1981 October 16

Erwin Schwab
Siegfriedstrasse 118
6148 Heppenheim
West Germany

Dear Mr. Schwab,

Regarding your letter of October 10, the second object on your photograph of (5) Astraea is the minor planet (106) Dione. The Russian hard-bound annual volume Ephemerides of Minor Planets is available from the Central Bureau for U.S. \$6.00 each. Both 1981 and 1982 copies are currently available. The 1981 volume would have, for example, enabled you to identify your suspect with (106) Dione.

Sincerely,

Daniel W. E. Green
Assistant Director, CBAT
